

SOLUZIONI

Per ogni esercizio si mostra la soluzione in due passaggi: prima vengono disegnati i limiti alle estremità ed, in corrispondenza di ogni x un puntone (se c'è $f(x)$) o due linnette ai lati (se ci sono i limiti destro e sinistro); poi si collega il tutto. Quando due entità da collegare giacciono alla stessa quota vengono mostrati (in due colori diversi) due collegamenti, del tutto equivalenti fra loro (ma ne va rappresentato uno solo).
